

ELAKKIYA S

Location: Tirupur, Tamil Nadu, India Phone: +91 7305313376 Email: elakkiya.s0606@gmail.com

PROFESSIONAL SUMMARY

Motivated B.Sc. Computer Science undergraduate currently specializing in **MERN Stack Development & Generative AI**. Proficient in building modern, responsive frontend interfaces using **HTML5, CSS3, and Tailwind CSS**. Actively building hands-on projects and sharpening technical skills in full-stack web applications and AI integration. Possesses strong analytical capabilities, prompt engineering understanding, and a dedicated drive for continuous practical learning.

EDUCATION

B.Sc. Computer Science

Expected Graduation: 2027

LRG Government Arts College for Women, Tirupur, Tamil Nadu

ONGOING PROFESSIONAL TRAINING

Full Stack Web Development (MERN) & Generative AI

In Progress

- Gaining comprehensive expertise in MongoDB, Express.js, React.js, and Node.js for full-stack application development.
- Exploring Generative AI concepts, prompt engineering techniques, and practical AI integrations into web systems.

TECHNICAL & CORE SKILLS

Frontend Web:	HTML5, CSS3, Tailwind CSS (Framework), Responsive Web Design
Full Stack & AI (Learning):	MERN Stack (MongoDB, Express, React, Node.js), Generative AI Concepts
AI & Core Competencies:	Prompt Engineering, AI Response Evaluation, Text Annotation, Fact-Checking
Languages:	English (Fluent), Tamil (Native)
Soft Skills:	Problem Solving, High Attention to Detail, Analytical Thinking, Time Management

PROJECTS & PRACTICAL WORK

Responsive Web Layouts & Frontend Components

Practical Work / Projects

- Responsive Web Design:** Designing and implementing clean, mobile-friendly web pages using modern HTML5, custom CSS3 styles, and Utility-First Tailwind CSS framework.
- UI Practice & Layouts:** Building responsive landing pages and component layouts focused on high visual appeal, alignment, and optimal user experience.

AI Content & HTML Structure Evaluation

Academic / Independent Project

- Model Output Evaluation:** Analyzed multi-turn prompts and evaluated AI-generated text and HTML responses for logical correctness and structural accuracy.
- Verification & Test Cases:** Created structured test cases to measure logic verification and language accuracy across bilingual datasets (English & Tamil).
